

QUALITY CONTROL INSPECTOR

Please complete the following short questionnaire (CHOOSE ALL THAT APPLY)

1.

Do you have good eyesight at close distances up to 4 feet?

- a. Yes
- b. No

2.

What is a caliper?

- a. A tool that is used to pick up small objects
- b. A tool that is used to measure the weight of small objects
- c. A tool that is used to measure small internal and external distances
- d. The internal diameter of a tube
- e. The external diameter of a cylinder

3.

What is a mil?

- a. One one-thousandth of an inch
- b. .001 inch
- c. One one-thousandth of a millimeter
- d. .001 millimeter

4.

A micron is:

- a. One one-thousandth of a millimeter
- b. A metric unit of measurement
- c. A micrometer
- d. All of the above

5.

Do you have any experience reading CAD drawings?

- a. Yes
- b. No

6.

A customer order is scheduled to ship today and all shipments must be packaged and submitted to accounting in a half hour. You notice that one screw is missing from one of the products. What do you do?

- a. Pull a screw from the stockroom and put it in yourself
- b. Take the part back to assembly and request that the assembler insert the proper screw within the next few minutes.
- c. Approve the product for shipment as is. There are plenty of screws holding the components together.
- d. Set the product aside so it can be dealt with tomorrow.

7.

You notice that an inventory bin is labeled with the wrong part number. What do you do?

- a. You write the mislabeled part number down and give the information to inventory accounting for further review and correction.
- b. You cross it out and write the correct number on the label
- c. You tell one of the employees in assembly and assume they will take care of it.
- d. You do nothing. It is not your responsibility.

8.

A countersink is?

- a. A special sink that is used to wash machined parts.
- b. A tool for drilling holes that are threaded so a screw can be inserted in a counter clockwise direction.
- c. A recessed cutout, for example, so a glass plate can be recessed into a metal frame.
- d. A specially drilled hole that allows the head of a screw to lie flush with or below the surface.

9.

Please indicate which of the following priorities are the most important to you

- a. A product must be complete, fully inspected, in proper working order and free of fingerprints and other markings prior to shipping to a customer.
- b. All shipments must be made on time at any cost.
- c. Extra work and overtime must be avoided in order to save money.

10.

Have you use a computerized inventory management system before?

- a. Yes
- b. No

11.

Someone from accounting is asking you questions regarding a shipment that is not scheduled to occur for two more days. It is now time for your scheduled break.

- a. You consider accounting an annoyance.
- b. You tell accounting it is not your problem.
- c. You walk away and go on your scheduled break.
- d. All of the above.
- e. You try to be helpful and go on your break when you have finished helping accounting.

12.

It is Friday and 10 minutes until it is time to go home. You are working on a project that requires fifteen more minutes to complete. What do you do.

- a. You work until it is time to go home and then leave because you can finish the project on Monday.
- b. You stop what you are doing, put away your smock, stand by the clock and wait so that you can punch your time card at the exact moment it is time to leave.
- c. You stop what you are doing, put away your smock, and leave early since you cannot finish the project before it is time to leave anyway.
- d. You stay a few extra minutes and finish the project.
